SCREEN PORCH KITS

Custom made aluminum or cedar porch panels create a beautiful screened-in porch.

If you have a old screened porch that is in need of an upgrade, or a roof overhang that is not enclosed, we have the perfect solution. Take out all the horizontal members and replace them with either maintenance free aluminum or long lasting cedar porch panels. These screened panels also have a sliding window option allowing you to turn your porch into a 3-Season room.

How Much Does It Cost?

The cost of our panels is based on lineal feet of panels. For example, the two sided porch pictured above is 12'x12', which is 24 lineal feet. The 3' door panel, which is sold separately, is subtracted out of the total footage. Lineal foot costs run from \$73/Ln Ft for a simple aluminum screened panel to over \$200/Ln Ft for an aluminum panel with sliding glass windows. There are many panel types available.

Sample Costs: 3 Sided Porch, 12' out from house, 12' across and 12' back to house with 1 door (33 Ln Ft).

- 1) Simple Aluminum Screen Porch - 33' x \$73 = \$2,409 + \$500 for Screen Door Section = \$2,904.
- 2) Aluminum Panel with Sliding Glass Windows - 33' x \$173 + \$514 Storm Door Section = \$6,223.

Price includes everything needed to install your panels. Aluminum panels come with "C" channels that mount to the floor and vertical roof supports. For more information call us or visit our website at
